### EDUCATION

#### Software Engineering

Osun State University

01/2023

### EXPERIENCE

#### Junior Software Developer

Leadway Assurance

04/2025 - 09/2025 Osun, Nigeria

Leadway Assurance is an insurance company with over 8 different division, the IT division being one of them, was were as I was assigned the role of Junior Software Developer.

- Proven ability to reverse engineer and optimise complex systems, demonstrated through an internship at Leadway Assurance.
- Developed full-stack solutions using .NET Web API for backend services and React with TypeScript for frontend interfaces
- Implemented RESTful APIs and integrated them with React components to ensure seamless data flow between frontend and backend
- Participated in code reviews and contributed to best practices for modern web development workflows

#### Full-Stack Developer (Freelance)

Self Employed

01/2023 - Present Location

##### Company Description

- Build full-stack web applications integrating frontend technologies (HTML, CSS, JavaScript, React) with backend development using Node.js and Express.js
- Design and implement RESTful APIs for efficient data handling between client and server, ensuring seamless application performance
- Manage server-side logic, routing, and database integration to create robust and scalable applications
- Develop responsive, mobile-first websites that enhance user experience across all devices
- Leverage npm packages and modern development tools to optimise workflows and increase project efficiency

### PROJECTS

#### Drag and Drop Todo List Web App

Built an interactive task management application featuring intuitive drag-and-drop functionality. Utilised modern JavaScript frameworks to create a responsive, user-friendly interface that improves productivity and task organisation.

#### Full-Stack Web Application

Developed a comprehensive web application combining frontend frameworks with Node.js and Express backend. Achieved a cohesive, responsive experience with seamless integration between client-side and server-side components, performing optimally across all devices.
